PROJECT-2 CALCULATOR WEB APPLICATIONS

MLSA INTERNSHIP PROGRAM

Microsoft

Microsoft
Learn Student
Ambassador

OBJECTIVES:-

- Develop a simple interface for easy-use.
- Implement basic arithmetic function: Addition
- ,subtraction,division,multiplication.
- Ensure responsive design for desktop.
- Include clear/reset functions for user-convenience.

Project - Overview. ->

INTRODUCTION:-

PURPOSE:-

- To create a user-friendly web-based calculator for basic arithmetic operations.

TARGET AUDIENCE:-

- Anyone needing quick calculations, including students, professionals, and casual users.

DESCRIPTION:-

- It contains **HTML** file which gives the semantic structure to my calculator web application.
 - Then there comes my **CSS** file which gives the styling for aesthetics and layouts and components to my web page, with the embarkment of colours and various features.
 - The last and most important is my **JAVA SCRIPT** file which provides the logic for calculations and interactivity.
- 

Implementation:

- Step-by-Step Development:
 - Designing the layout in HTML.
 - Styling with CSS for responsiveness.
 - Implementing JavaScript for functionality:
 - Handling button clicks and updating the display.
 - Performing calculations based on user input.

Conclusion:-

- Through this project I got to learn the basics in the web development field.
- This calculator is summed up with lot of function and interactive interface for the targeted audience.
- Helped me to grow in the domain of web development.

The image features a light beige background with the text "Thank You" centered in a dark brown, serif font. The text is arranged in two lines: "Thank" on the top line and "You" on the bottom line. In the corners, there are stylized illustrations of leafy branches. The top right corner has branches with orange and grey leaves. The bottom left corner has branches with orange and pink leaves. The bottom right corner has a branch with pink leaves.

Thank
You
